We take the worry out of protecting what’s valuable to you.
Lockwood: no worries®
Keyless Entry

Never carry keys again!

Imagine never having to carry keys to your home.

Lockwood is leading the way in technology with a range of 6 exciting keyless locks to fit in with your lifestyle. Each has different features which this brochure will guide you through to help you select the right product for your and your family's needs. Not only is keyless locking more convenient, but it also puts a stop to lost keys and lock outs.

With the added peace of mind offered by Lockwood’s 25 Year Mechanical Warranty and range of safety features, there’s no better time to go keyless.

Make your world keyless with **Lockwood: no worries**.
Keyless Digital Deadlatch

- Unlock with pin or key card
- Program multiple user codes

The 001Touch™ Digital Deadlatch combines a stylish digital touch screen keypad with the security of the iconic Lockwood 001® Deadlatch. The simple convenience of using a pin code means you never have to carry keys again!

Illuminated touchscreen keypad
The touch screen keypad has no mechanical buttons which means no trace of your secret pin code.

Pin code or key card
Choose the convenience of a pin code or key card. One master pin code will manage up to twenty user pin codes. Up to 20 key cards can also be programmed.

Cryptic code function
Prevent others from identifying your pin code during access. The cryptic code function confuses the onlooker but at the same time allows you to still gain entry.

User code that expires
A temporary pin access code can be programmed to last from three hours to two weeks. This is ideal for allowing short-term access to your property and reduces the potential risks in giving your keys to a tradesman, cleaner or neighbour.

Visual guide for programming
For added convenience, an illuminated guide will assist in the programming of your 001 Touch™.

Low power consumption
Four standard AA batteries will unlock a door up to 10,000 times. A warning light will appear when the battery level reaches less than 30%.

Battery check function
The battery level can be checked without removing the batteries.

Emergency battery connection
In the event the battery goes flat, two battery contact points will fit a standard 9V battery. A temporary charge will allow entry with the pin or key card.

Smart memory
The settings, codes and key cards will remain programmed in the lock should the batteries go flat.

- 2 Keys Included Can be keyed alike to other Lockwood door locks.
- Batteries 4 x AA batteries included.
- Proximity Card 2 key cards included.
- Deadlatch Bolt Stainless steel 18mm projection.
- Emergency 9V Battery Connection in the event your batteries are depleted.
No Keys? No Worries. The Lockwood Digital Deadbolt lets you unlock your front door by entering a simple code.

Ideal for use on new doors or as a replacement on an existing door lock on your home, the Keyless Digital Deadbolt is also suitable for internal and light commercial doors such as storerooms and shop fronts.

**Illuminated touch screen keypad**
The touch screen keypad has no mechanical buttons which means no trace of your secret pin code. One master pin code will manage up to twenty user pin codes.

**Cryptic code function**
Prevent others from identifying your pin code during access. The cryptic code function confuses the onlooker but at the same time allows you to still gain entry.

**Visual guide for programming**
For added convenience, an illuminated guide will assist in the programming of your Digital Deadbolt.

**Low power consumption**
Four AA alkaline batteries will unlock a door for approximately 12 months if used 10 times per day. A battery icon will begin flashing when the battery level reaches less than 30%.

---

**Emergency key override**
In the event your battery goes flat there is a key override function that will prevent you from being locked out.

**User code that expires**
A temporary pin access code can be programmed to last from three hours to two weeks. This is ideal for allowing short-term access to your property and reduces the potential risks in giving your keys to a tradesman, cleaner or neighbour.

**Code lockout settings**
Privacy mode allows you to deactivate the external keypad from the inside providing a secure environment from others who may have pin code access. By using your master pin, you can also restrict all user pin access.

Lockwood’s innovative door handle with integrated electronic security, offers simple and effective keyless locking, without compromising aesthetics.

Designed to enable conveniently controlled access to a door with easy installation, Code Handle is ideal for offices, store rooms or a study at home.

The Code Handle provides flexible locking options for doors that need to be always locked or alternatively can be left open to provide free access during the day and locked at night. The Code Handle is an electronic product that is not weather rated, so use should be limited to appropriate environments.

**Key features**
- Lever handle with integrated code lock
- Program up to 9 user codes, 4-6 digits in length
- Supplied with Lockwood S30 60mm latch
- Easy to install
- Ideal for retrofit installations
- Programmable administration code for setting lock operation and user programing
- Manual or automatic locking
- Passage mode
- Code lockout for 3 minutes after 5 incorrect attempts
- Durable stainless steel handles
- Left and right handed versions

**Retrofitable**
Fits majority of doors with a 54mm hole. Designed to provide convenient keyless access to a door by replacing the existing door handle.

**Code Handle Keyless Lockset**
- **Installation**: 25mm latch hole and 54mm lock hole
- **Backset**: 60mm (70mm and 127mm latches available)
- **Latch**: Brass 13mm projection deadlatch
- **Door Thickness**: 32 to 55mm
- **Finish**: Satin Pearl with Stainless Steel

The Lockwood Digital DX Locksets provide a mechanical method of keyless entry and are designed to control access into commercial areas, especially when frequent combination changes are needed to maintain security.

As the digital lockset utilizes mechanical operation, electrical wiring is not required. For extra security when under forced attack, the inbuilt clutching mechanism allows the outside knob to rotate without operating or damaging the lock.

The factory set 5 digit code is easily changed to any 4, 5 or 6 digit code using the code changing kit provided with each lock.

**Outside function**
Press the C button, enter the correct code, then turn the knob to unlock the door. Upon releasing the turn knob the code is automatically cancelled.

**Inside function**
Opened by knob/lever at all times.
