SMARTair™ Stand-Alone

Security, simplicity, convenience

SMARTair™ is a powerful access control system that is simple to install, simple to configure, simple to administer and maintain.

Businesses small and large, want the security of knowing that lost credentials can be prevented from gaining access quickly and the flexibility to restrict user movements within the building. Audit trails can show historical movement for reporting purposes.

SMARTair™ offers an intelligent, yet simple, step up from keys, and a cost effective alternative to traditional access control. No bells, whistles, or wires, just sleek, reliable security.

SMARTair™ Stand-Alone

SMARTair's attractive slimline Escutcheon design allows it to be fitted to any type of door from timber and steel to UPVC and aluminium section. External versions are also available.

The SMARTair™ knob Cylinder is flexible enough to provide access control to a standard oval cylinder - with no drilling required. Installation can be completed in under 1 minute.

SMARTair™ Wall Readers are available for internal and external use, where the door isn't suitable for an Escutcheon. These will connect to any electronic locking device.

SMARTair™ technology is also incorporated into other systems such as lift control readers, to provide security on a floor by floor basis, and energy saver hardware, allowing SMARTair™ users to control lights and air-conditioning.

It's as easy as 1, 2, 3

1. Install the software

Create the users/doors, then apply the relevant access permissions.

2. Install the hardware on the door

Select the correct mortice lock, mark out and drill the holes, place the unit on the door and tighten using the included screws. Fit the batteries/ rear cover and finally the handles.

3. Initialise the system and go

Apply the access parameters and the system is ready to use.

Benefits

Simple to install

SMARTair's battery powered Escutcheons require no expensive cabling, may be retrofitted to existing doors and are easy to set up and use.

Simple to manage

With SMARTair's simple management software it's easy to load the correct information quickly and tailor the system for any customer. For the operator, learning how to apply and revoke permissions can be done in minutes.

Simple to maintain

A 12-24 month battery change cycle is all you need to keep the system running in top shape.

Cost effective

Due to the unique design, the total installed cost of SMARTair™ is generally half that of traditional access control systems, whilst still offering everything the system user will need.

Proximity access

Due to the unique design, the total installed cost of SMARTair™ is generally half that of traditional access control systems, whilst still offering everything the system user will need.

Attractive design

The elegant slimline looks of SMARTair™ suits any building new or old.

SMARTair™ Stand-Alone

How does it work?

- SMARTair™ Stand-Alone is a simple access control solution that uses programming cards to add and delete users, no software required.
- The Stand-Alone programming works on a 'shadow card' system whereby each user card created has a shadow created alongside it. The user card is handed out and the shadow card retained by the system administrator.
- If any user card is lost, the shadow card associated with that user is used to remove it from the system.
- Any found cards can be recycled and handed out to new users. Old shadow cards, where the user card isn't found can also be used again – either as user cards or shadow cards. There is no limit on how many times a card can be reused.

Example: Single door securing a store room in a retail outlet where proximity security is needed but advanced access control features are not required.

SMARTair™ Stand-Alone

Where can it be installed?

SMARTair™ adapts to all types of buildings requiring electronic access control or remote management:

Healthcare

- Prevent visitors entering a doctors surgery in a GP premises

Education

- Stop access to classrooms when there is no teacher present at a school

Commercial

- Keep visitors from accessing staff only areas in an office

Industrial

- Keep untrained staff away from heavy machinery rooms in a factory

Historical buildings

- Provide security when it isn't possible to modify architecture for hardwiring

Its user-friendliness and simple installation make SMARTair™ the perfect solution for new buildings and retrofits alike. SMARTair™ offers a wide range of products perfectly adapted to different kind of doors:

- Escutcheon handle for standard doors
- Wall reader for glass doors or where you need to control a magnetic lock
- Electronic Knob Cylinder to replace a mechanical cylinder with no drilling required
- Electronic cabinet locks, to secure anything from medicine cabinets to gym lockers
- Energy saving device to limit power to only those who are authorised to use it

SMARTair™ Stand-Alone Hardware
