Fitting Actuator Bar and Auxiliary Locks

Note: For ease of fitment remove door from the door frame.

- Assemble the Actuating Bar and Rods as shown prior to fitting to the door stile. With the "TOP" mark facing the front.
- Keep the locating lugs of the Actuating Bar facing the front edge of the door.
- Insert the Actuator Bar and rod assembly through the top cut-out and slide it through the door stile.
- With the Auxiliary locks in the locked position (as shown), connect the top Auxiliary lock first to the end of the rod followed by the bottom Auxiliary lock.
- Then push them both into the door stile.

Fitting Central Lock

With the central lock in the factory set Deadlock position, insert into the stile. Locate and engage the lug on the Actuating Bar with the lock, then secure with screws.

Important: The lock must be installed in the position shown, product warranty cannot be assured if installed upside down.

Fitting Cylinder & Spindle

- Insert cylinder so cam turns towards front of door.
- Loosely fix cylinder with screw.
- Then insert spindle into lock body.

Fitting Escutcheon

- Fit escutcheon with snib on the inside face of the door.
- Ensure snib is to 90 degrees in the direction of the lever.
- Secure inside and outside escutcheons with screws and screw hole plugs.

Fixing Screw to Top and Bottom Auxiliary Locks

- Gently push the top Auxiliary lock upwards to retract the hook bolt.
- Lightly fix screw in slotted hole.
- Repeat this step for the bottom Auxiliary lock.

Securing Top and Bottom Auxiliary Locks

Drill a 3mm hole through bottom hole in the Auxiliary locks, secure with fixing screws.

Test Safety Mode:

Important: Release button above hook bolt must be depressed.

Rotate key or snib 90 degrees away from the lever:
- Padlock symbol is visible.
- Inside and outside levers are locked.
- Auxiliary hook bolts are thrown and locked, push hook bolts upwards to check.
- Repeat STEP 6 to return lock to Passage mode.

Test Deadlock Mode:

Important: Release button above hook bolt must be depressed.

Rotate key 180 degrees towards the lever:
- Snib rotates 90 degrees towards the lever, padlock symbol is visible.
- Inside and outside levers are locked.
- Auxiliary hook bolts are thrown and locked, push hook bolts upwards to check.

Important: Reposition top and bottom Auxiliary locks if necessary to achieve Safety and Deadlock modes, then fully tighten fixing screws in STEP 8.
Mark Central Strike Position
Hold the door against the jamb and mark a line level with the mark on the front of the central lock body.

Mark Auxiliary Strike Position
Hold the door against the jamb and mark the door jamb level with the mark on the front of the Auxiliary lock body.

Fix Screws
Secure the Central strike with fixing screws. Maximum clearance between door and jamb should not exceed 4mm.

Fix Screws
Secure the Auxiliary strike with fixing screws. Maximum clearance between door and jamb should not exceed 4mm.

Both sides of the door section must be cut to the dimensions given. Start with the centre of door (CL OF DOOR) then measure 69.5mm BELOW and mark the (CL OF CUTOUT).
