# CL-150S Cabinet Lock with Spring Release

The Lockwood CL-150S electric Cabinet Lock is a compact, versatile and flexible locking solution for Lockers, Cupboards, Drawers and a variety of applications using swing or sliding doors and drawers.

The CL-150S also provides a spring release function negating the need for handles on smaller lockers and cabinets as it pops open the door on release. The Cabinet Lock also includes Lock State Monitoring and 12 or 24VDC operation.

With a Holding Force of 100kg, the CL-150S is the ideal electric locking solution for a host of applications and can be used in conjunction with most Access Control, Intercom, Keypad or Card Reader systems. For added flexibility in different applications and door or cabinet styles, the compact locking mechanism and body also allows for the Strike Plunger to engage into either the Edge or the Top of the Lock body.

The CL-150S is suitable for use with University and School staff or student lockers, Hospital, Aged Care and Clinic medicine cabinets and drawers, Office and Retail display cabinets, Filing Cabinets and drawers and Post boxes, just to name a few.

## Key Features

- Spring Loaded Release
- Lock Status/Plunger position Monitoring with NO/NC Output
- 12 or 24VDC Operation
- 100kg Holding Force
- Top or Edge Strike Plunger engagement
- Fail Secure configuration

|-------------|---|
| CL-150S     | Lockwood CL-150S Cabinet Lock with Spring Release |

## Specification Statement

The electric Cabinet or Drawer lock shall be surface mounted and enable engagement of the Strike Plunger either into the edge or top of the lock body. The lock shall provide a Spring release function which pushes open the cabinet or locker door therefore negating the need for a door handle. The Lock shall provide Lock/Door Position Monitoring Output and a Holding Force of no less than 100kg.

# EL110 Electric Cabinet Lock

The Lockwood Padde Series EL110 electric cabinet lock is a compact, cast aluminium lock specially designed for cabinets having either swing or sliding doors. The cabinet lock can be surface mounted either vertically or horizontally and offers maximum flexibility for ease of installation.

EL110 can also be controlled by any existing access control system or simply controlled through a remote keypad or keyswitch. The EL110 is cost efficient, robust, easy to install and suitable for one or multiple cabinet applications.

### Key Features

- Fail safe/fail secure changeable on site
- Flexible alignment: has a 5mm XY adjustment after installation
- Low current consumption: uses only 187mA @ 12Vdc
- Available in 12Vdc
- Self latching in fail secure mode
- Solenoid rated for continuous use
- 5 Year Tricare Warranty (Padde Series)

### Applications

- Cabinet locking
- Swing or sliding cabinet doors

| EL110-2     | EL110 Cabinet Lock 12Vdc Fail Secure Non Monitored |

## Specification Statement

The strike which is to be surface mounted and constructed of cast aluminium, should be self latching when used in fail secure mode. The lock must be capable of being changed from fail safe to fail secure on site. Lock alignment must be adjustable up to 5mm in both "x" and "y" directions both during and after installation. The lock should consume not greater than 187mA @12Vdc and have a solenoid rated for continuous use. Electrical certifications must include CE and C-tick.

# ES110 Series Electric Strike

The Lockwood Padde Series ES110 is a cost efficient robust electric strike with a solid construction of one-piece cast aluminium body and stainless steel striker. Having a deeper than normal strike-keeper area, ES110 is designed to work with an extensive range of locks and offers the same level of security and reliability usually provided by more expensive electric locking solutions.

Extension lips are available to accommodate the installation of electric strikes on door frames with different thickness. The ES110 product range of patented electric strikes are suitable for use with all access control installations where flexibility, security and lower cost are required.

## Key Features

- All models IP56 Weather resistant
- Fail safe/fail secure changeable on site
- Stainless steel striker for extra strength and durability
- Stainless steel locking pins
- Multi Voltage 12/24Vdc Multi Voltage
- Optional mounting kit
- Installation template
- Suitable For 18mm latch with a 3mm door gap
- 5 Year Tricare Warranty (Padde Series)

## Applications

- Exposed areas
- High traffic areas
- Open in/open out doors
- Suitable for use with all access control systems

## Specification Statement

Where Power to Lock and Power to Open functions may be required in the same building, the strike must be interchangeable from either "Power to Lock" or "Power to Open" on site.

The electric strike should not consume current greater than 250mA @ 12Vdc - 125mA @ 24Vdc and have a solenoid suitable for continuous use. Certifications must include CE, C-tick and 4hr fire rating.

The strike should have a minimum holding force of 680kg, and an endurance rating of 1 million cycles.

# ES150 Series Surface Mounted Electric Strike

The Lockwood Padde Series ES150 is a surface mounted electric strike suitable for use with rim or surface type dead latches. This strike is easy to install and can be simply controlled by a keypad, keyswitch or integrated into any access control system.

ES150 offers high levels of security and features usually provided by more expensive electric locking solutions. The electric strike can be easily installed on steel and wooden door frames. A weather resistant version is also available for exterior applications.

## Key Features

- Configure to fail safe or fail secure
- Easy installation suitable for steel and wooden door frames
- Stainless steel striker for extra strength and durability
- Available in 12/24Vdc
- Solenoid rated for continuous use
- IP56 weather resistant version available
- 5 Year Tricare Warranty (Padde Series)

## Applications

- Surface or rim mounted applications
- Suitable for use with all access control systems
- Exposed areas

## Specification Statement

The electric strike must be suitable for surface mount applications for use with rim or surface mount door locks.

Where Power To Lock and Power To Open functions may be required in the same building, an individual strike is interchangeable from either "Power to Lock" or "Power to Open" on site.

The electric strike should not consume current greater than 250 mA @ 12Vdc - 125mA @ 24Vdc. Certifications must include CE and C-Tick.

The strike should be tested to 1 million operations and have a minimum holding force not less than 680kg.

# ES200 Non Monitored Series Electric Strike

The Lockwood Padde Series ES200 series electric strikes are high security products manufactured from stainless steel and designed for use with all access control systems. The strikes are suitable for use with hinged doors which require either fire or security control as part of a building management system.

These strikes are flexible and can be changed from fail safe to fail secure, mounted on the left or right hand side of the door and are available in 12 or 24Vdc.

They offer a strong, dependable and long-lasting electric strike solution.

## Key Features

- Fail safe/fail secure changeable on site
- High security
- 4 Hour fire rating
- 850kg holding force
- 1 million cycles endurance rating
- Cast stainless steel body
- Stainless steel locking pins
- Low Current consumption - Max 175mA @ 12Vdc
- Mounting kit supplied as standard
- 5 Year Tricare Warranty (Padde Series)

## Applications

- High traffic areas
- Fire rated door sets
- Open in/open out doors
- Suitable for use with all access control systems

The strike should be constructed of stainless steel, have a minimum holding force of 850kg and have an endurance rating of 1 million cycles. Monitoring must include independent door / latch & solenoid monitoring. The one strike must be changeable from fail safe to fail secure on site where required. The strike should not consume current greater than 175mA at 12Vdc and have a solenoid rated for continuous use. Certifications must include CE, C-Tick and 4 hr fire rating.

# ES2100 Series Monitored Electric Strike

The Lockwood Padde Series ES2100 is the latest product to join the iconic Lockwood range of electric strikes. Tested in accordance with Australian standards this strike offers superior strength, and is durability tested to 1.5 million operations.

Standard features include variable voltage, patented field selectable fail safe/fail secure mode change and a unique integrated door position switch.

## Integrated Door Position Switch

The ES2100 now offers a unique new monitoring feature not available in other strikes on the market today. The strike has an integrated reed switch that when combined with a specialised Lockwood mortice lock, provides door position monitoring. The strike is supplied with a standard door magnet for use with cylindrical latches. Lockwood mortice locks and face plate accessories are sold separately.

## Key Features

- Patented field selectable fail safe/fail secure
- Multi voltage 10–30Vdc
- Fully monitored:
  - Integrated door position (reed) switch
  - Solenoid/Locked
  - Latch position
- 1000kg holding force
- 4hr fire rating
- Mounting tabs as supplied standard
- 5 Year Tricare Warranty (Padde Series)
- Weather Resistant (IP54)
- Built in Protection Diode

## Applications

- High traffic areas
- Fire rated door sets
- Open in/open out doors
- Suitable for use with all access control systems
- Doors requiring additional door position monitoring

### Ordering Notes:

When using integrated door position switch monitoring:

- Electric strikes are supplied with door magnet for cylindrical locksets only.
- Lockwood Mortice Locks and face plates are sold separately.
- All strikes are factory set to fail safe (PTL) configuration. Configuration to Fail Secure (PTO) is easily set on site.

### Specification Statement

The strike should be constructed of stainless steel, have a minimum holding force of 1000kg and an endurance rating of 1.5 million cycles. Monitoring must include independent latch and solenoid monitoring. The strike shall have an integrated reed switch for door position monitoring and used in conjunction with Lockwood 3572MAGSC mortice lock. Certifications must include CE, C-tick and 4 hr fire rating.

# ES2600 Series Panic Bar Monitored Electric Strike

The Lockwood Padde Series ES2600 Series surface mounted electric strikes are high security products manufactured from stainless steel and designed to be used with existing and new panic bars fitted to emergency doors.

When used in conjunction with a standard access control system, these strikes convert "Exit only" doors with "Pullman type" latches into a full access controlled door, thereby allowing authorised access from the secure side.

The ES2600 series are fully monitored with both solenoid and latch/door monitoring functions & can be changed from fail safe to fail secure on site.

## Key Features

- Fail safe/fail secure changeable on site
- High security
- Available in 12 or 24Vdc
- 650kg holding force
- 1 million cycles endurance rating
- Body depth only 27mm
- Cast stainless steel body
- Low current consumption - max 175mA @ 12Vdc
- Continuously rated solenoid
- Installation template
- 5 Year Tricare Warranty (Padde Series)

## Applications

- For use with panic bars
- Surface mount
- Egress doors
- Fire rated door sets
- Open out door sets
- Suitable for use with all access control systems

|-------------|---|
| ES2600-1    | ES2600 Panic Bar E/Strike 12Vdc Fail Safe Monitored |
| ES2600-3    | ES2600 Panic Bar E/Strike 24Vdc Fail Safe Monitored |

## Specification Statement

The strike should be constructed of stainless steel, have a minimum holding force of 650kg and have an endurance rating of 1 million cycles. Maximum penetration into the door frame should not exceed 12mm. The one strike must be changeable from fail safe to fail secure on site where required. The strike should not consume current greater than 175mA at 12Vdc and have a solenoid rated for continuous use. Certifications must include CE and C-Tick.

# ES3200 Series Monitored Electric Strike

The Lockwood Padde Series ES3200 series electric strikes are designed for high security applications and manufactured from solid stainless steel.

These long ANSI strikes offer a strong dependable and long-lasting electric strike solution and are suitable for use with any access control system.

These strikes are extremely flexible and can be changed from fail safe to fail secure and mounted on the left or right hand side of the door, thus reducing the amount of variants needed to cover each application.

## Key Features

- Fail safe/fail secure changeable on site
- Available in 12Vdc
- Strike and Latch Monitoring
- 850kg holding force
- 1 million cycles endurance rating
- Stainless Steel locking pins
- Continuously rated solenoid
- 5 Year Tricare Warranty (Padde Series)

## Applications

- Timber or metal doors
- Open in/open out doors
- Suitable for use with all access control systems

## Specification Statement

The strike should be constructed of stainless steel, have a minimum holding force of 850kg and have an endurance rating of 1 million cycles. Monitoring must include independent door / latch & solenoid monitoring. The one strike must be changeable from fail safe to fail secure on site where required. The strike should not consume current greater than 175mA @ 12Vdc and have a solenoid rated for continuous use. Certifications must include CE and C-Tick.

# ES9000 Series Pre-Load Strike

The Lockwood Padde Series ES9000 has been designed to suit the harshest commercial environments, and has the unique feature of the ability to operate with up to 25kg of pre-load pressure on the keeper. Pre-load is a common condition that is caused by pulling on a door before it unlocks, the weight of warped or drooping doors, seals on fire doors or by differential air pressure created when heating and cooling systems are in use.

Standard features include multi voltage 10 - 30Vdc and field changeable settings from fail safe to fail secure.

Built to last, this is a premium locking solution that has been tested in excess of 2 million cycles and boasts unique features like no other available on the market today.

## Key Features

- Operates under pre load up to 25kg
- Easy field selectable fail safe/fail secure
- Multi voltage 10-30Vdc
- 1300kg holding force
- 2.5 million cycles endurance rating
- Latch keeper is significantly quieter in operation
- Weather resistant
- Mounting tabs as standard
- Non handed
- 5 Year Tricare Warranty (Padde Series)
- Weather Resistant (IP54)
- Built in Protection Diode

## Applications

- High traffic areas
- Doors subjected to side load (pre load)
- Fire rated door sets
- Open in/open out doors
- Suitable for use with all access control systems

## Product Details

**Note:** All ES9000 series electric strikes are supplied in Fail Safe configuration.

## Specification Statement

The electric strike should be fully monitored and have independent door / latch and solenoid monitor switches. Holding force for the strike should be not less than 1300kg.

Where Power to Lock and Power to Open functions may be required in the same building, a single electric strike should be interchangeable from either fail safe or fail secure from the rear of the strike.

The electric strike should not consume current greater than 250mA @ 12Vdc and have a solenoid rated for continuous use. A fire rating not less than 4 hours is required where applicable. The strike must be capable of operating with up to 25kg of pre-load pressure applied to the keeper, be tested to 2.5 million operations and carry a minimum warranty of 5 years.

# ES9100 Series Pre-Load Strike with Door Position Monitoring

Following on from the extremely popular and industry leading Lockwood/Trimec ES9000 Pre-Load Electric Strike, the Lockwood ES9100 Electric Strike provides all the key features and specifications of the ES9000 but with the added inclusion of Door Position Monitoring (DPS) via an integrated Reed Switch. The ES9100 body is also pre-drilled for the inclusion of 25mm, 50mm or 75mm Extension Lips, if required.

The Lockwood Padde Series ES9100 has been designed to suit the harshest commercial environments, and has the unique feature of the ability to operate with up to 25kg of pre-load pressure on the keeper. Pre-load is a common condition that is caused by pulling on a door before it unlocks, the weight of warped or drooping doors, seals on fire doors or by differential air pressure created when heating and cooling systems are in use. Standard features include multi voltage 10 - 30VDC and field changeable settings from fail safe to fail secure. Built to last, this is a premium locking solution that has been tested in excess of 2 million cycles and boasts unique features like no other available on the market today.

## Key Features

- Operates under pre load up to 25kg
- Door Position Monitoring Output
- Lock Status and Latch Position Monitoring Output
- Easy field selectable fail safe/fail secure
- Multi voltage 10-30VDC
- 1300kg holding force
- 2.5 million cycles endurance rating
- Latch keeper is significantly quieter in operation
- Weather resistant (IP54)
- Pre-Drilled for Extension Lips
- Mounting tabs included
- Non handed
- 5 Year Tricare Warranty (Padde Series)
- Built in Protection Diode

## Applications

- High traffic areas
- Doors subjected to side load (pre load)
- Fire rated door sets
- Inward and Outward opening doors
- Suitable for use with all access control systems
