001Touch Plus™

Smart Deadlatch

For over 40 years Lockwood's iconic 001 Double cylinder Deadlatch has been securing homes in Australia. Now you can upgrade your mechanical 001 Deadlatch to a smart solution.

Connected by Lockwood Home App/Yale Home App

The 001 Touch Plus Smart Deadlatch, connected by Lockwood Home App/Yale Home App, opens up your home to a range of smart lock features. You can control your lock using a PIN code, a Key Tag, or simply from your mobile devices. Using varying technologies including Bluetooth and GPS as well as the Mobile App, the auto unlock function unlocks your door as you approach. With 24/7 lock activity, you can see who and when people accessed your lock, when your mobile is connected to the lock via Bluetooth. The DoorSense™ position sensor checks the status of your door and tells you if your door is open or closed.

Ideal External Door Lock

The Lockwood 001Touch Plus™ operates with a Deadlatch and is suitable for use as a standalone lock or with an additional latch and lever/knob.

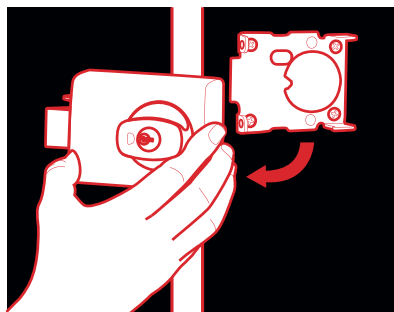

Remote Access and Works with

The 001Touch Plus Smart Deadlatch can be upgraded with the Yale Connect Plus 2 or Lockwood Home Hub (sold separately) to access your lock remotely, as well as voice assistant capability**.

Retrofittable

Compatible with most 60mm backset deadlatches***

Product Details

Part Number	LWL-001TDDL-CPDP LWL-001TDDL-MBKDP
Backset	60mm
Battery Cover	High quality ABS plastic
Door Thickness	32mm to 60mm
Finishes	Matt Black (MBK) and Chrome Plate (CP)
Keyfob	RFKF10
Key Pad Case	High purity zinc alloy
Latch	Stainless steel 18mm projection

Matt Black finish is available to purchase from Bunnings Only

*Lockwood and Yale smart products work seamlessly together, letting users control them through either the Yale home or Lockwood Home App.

**For the latest information on "Works With" integrations, please visit the individual product page on our website.

***The 001Touch Plus Smart Deadlatch is designed to replace or upgrade other Lockwood locks, such as the Lockwood 001, 002 deadlatch, and 100, 201, 211, and 213 Nightlatch and stream latches.

001Touch Plus™

Smart Deadlatch

Secure Mode

Secure mode gives the option to lock the 001Touch™ internally with a key. This secures the door on both sides with the ability to unlock the door with Lockwood Home App/Yale Home App, a PIN code or Keytag externally.

User Code that Expires*

A temporary code can be programmed to last from three hours to two weeks. This is ideal when a tradesman needs access for a few hours or when a neighbour is house sitting.

Visual Guide for Programming

For added convenience, an illuminated guide will assist in the programming of key features.

Low Battery Alarm

The Low Battery indicator on the front of the lock illuminates when battery level is low. You will also receive the low battery warning within the Mobile App, along with email notifications.

Smart Memory

The settings, codes and key cards will remain programmed in the lock in the event the batteries are depleted.

Emergency Battery Connection

9V battery backup terminal is at the front of the lock to gain access, if the batteries are flat.

*Check the next page for details on the feature differences with and without connecting to the Yale Home App

001Touch Plus™

Smart Deadlatch

Product Features with/without connecting with Lockwood Home App/Yale Home App

	Lockwood 001Touch Plus	Lockwood 001Touch Plus + Home Module	Description
4 - 10 digit PIN code		Yes (20 codes max.)	
Temporarily PIN code for visitor		Yes (1 code max.)	
Key Tag (includes two tags)		Yes	
Touchscreen with backlit Keypad	Yes	Yes	
Battery operated	Yes	Yes	
Low battery indicator with emergency battery connection	Yes	Yes	Low battery warning will be received within your Mobile App
User codes and settings remain if batteries are replaced	Yes	Yes	
Local Access (lock and unlock) via Bluetooth*	No	Yes	
Auto Lock/Unlock*	No	Yes	
DoorSense™ (Door position sensor)*	No	Yes	
Audit Trails*	No	Yes	
3 minute lock out if code is entered incorrectly 5 times	Yes	Yes	
Tamper alarm	Yes	Yes	
Change PIN re-lock time	Yes	Yes	If the Mobile App is used as a credential to unlock the door, then the re-lock time will always be 7 seconds.
Auto Re-lock On/Off	Yes	Yes	

NOTE:

To enable Mobile App functionality we highly recommend to connect your lock with Lockwood Home App/Yale Home App immediately after setting up the master code.

For security reason when the lock is registered with Lockwood Home App/Yale Home App, the lock enables 'Home App mode' and prevents the user to register the credentials from keypad (such as: add/remove user code / key tag except the master code).

All existing credentials (user code / key tag) will be erased as initialisation except the master code.

It is HIGHLY RECOMMENDED to register the credentials through Lockwood Home App/Yale Home App only.

*Functions are local access only, the Yale Connect Plus 2 or Lockwood Home Hub is sold separately to achieve remote control and access.

001Touch Plus™

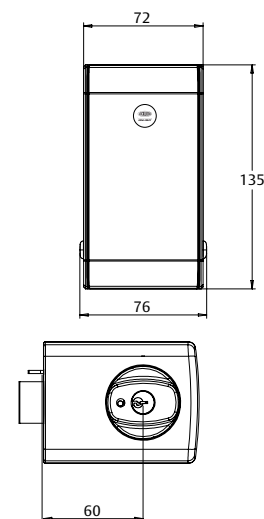

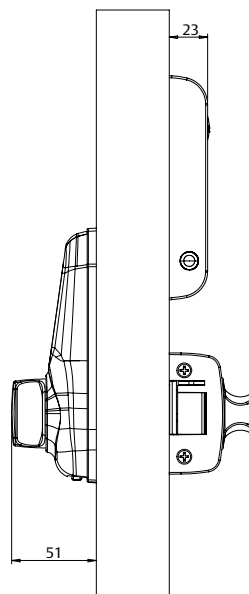

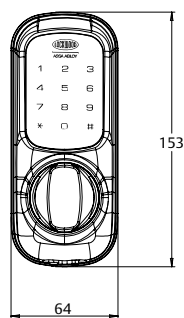

Smart Deadlatch

Exterior

Interior

Digital Touch Screen
Illuminated keypad.

Proximity Tag
2 Key Tags included.

SafetyRelease™
Minimises the risk of being locked in.

Retrofitable
Replace your existing 001 Deadlatch™.

LockAlert®
Interior Indicator shows lock status at a glance.

Can be keyed alike to other Lockwood door locks.

Exclusive to Bunnings Only

The Lockwood SDL™ Smart Leverset is an excellent option for both new builds and upgrading your current door lock. The SDL™ Smart Leverset features an illuminated keypad that makes locking and unlocking your door simple without needing keys. You won't have to hide keys anymore since you can create unique entry codes for trusted individuals and delete them anytime you need to. Perfect for doors that are 35-45mm thick and require a single hole preparation, including side entry doors, garage entries, basement doors, and home offices.

The Lockwood SDL™ Smart Leverset comes with a Bluetooth Yale Home Module, unlocking a range of smart features through the Yale Home* platform. It also seamlessly integrates with Apple's HomeKit ecosystem, providing smart home convenience from the moment you install it.

Key Features

- Simple installation
- Automatic relocking
- Create up to 250 unique PIN codes
- Mechanical Key Override
- Suitable for standard 54mm timber bore hole
- Adjustable 60-70mm backset deadbolt
- 4 x AA Alkaline Batteries
- 9V battery backup

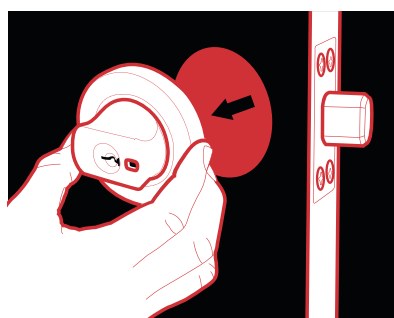

Works with your Smart Home

The Lockwood SDL™ Smart Leverset can be upgraded with a Yale Network Module (Z-wave Plus and Zigbee**) to integrate into most home automation systems or pair with Yale Connect Plus Hub 2 or Lockwood Home Hub for remote control and to enable 'Works With' integrations.***

Retrofittable

Fits majority of doors with 54mm hole

*This lock can be controlled using either the Lockwood Home App or Yale Home App.

**Yale Home Module is included, Z-wave and Zigbee modules are sold separately

***For the latest information on "Works With" integrations, please visit individual product website for details. To integrate with Apple Home (HomeKit), the lock must be paired through the Yale Home App.

Latitude Slim

Smart Mortice Lock

The Lockwood Latitude Smart Lock is a keyless, secure, and user-friendly smart lock featuring a sleek, narrow escutcheon design and a multi-backset mortice lock, making it suitable for both aluminium and timber-framed doors. Its versatility makes it ideal for most hinged doors, including the increasingly popular aluminium front doors.

Designed to withstand Australia's harsh weather conditions, the lock features a powder-coated diecast body and handle, along with a UV-protected screen for enhanced durability.

If you plan to install the Lockwood Latitude on aluminium-framed doors, it is fully compatible with the Induro® 4-Point lift-to-lock system, providing four locking points—including the latch, deadbolt, and shoot bolts—when the handle is lifted. This not only enhances security but also ensures optimal seal compression, especially for large panel doors.

For timber-framed doors or retrofitting on Optimum and Induro 2-Point systems**, the lock is also available in a 2-Point configuration (without shoot bolts), making it an ideal choice for retrofitting all exterior hinged doors—from slender to wide stiles, and from timber to aluminium.

The lock has a built-in keypad for convenient key-free access at all times, and it is controllable by the Lockwood Home App/Yale Home App.

Key Features

- Multipoint Locking - Lift to Lock
- Total Control via Lockwood/Yale Home App
- Auto Lock/Unlock
- Fake PIN code to prevent the code from being exposed
- Remote locking/unlocking
- Tailor user access
- Smart Lock alerts
- 24/7 Lock Activity Trails
- 100% Key free
- DoorSense™ technology for Door position
- Emergency Power Supply
- UV Tested
- Smart Home Automation
- 6-digit keypad entry
- Durable mechanism and stainless-steel faceplate
- Available in different backsets with short and long throw options

Works with your Smart Home

The Lockwood Home Hub/Connect Plus Hub 2 enables the 'Work With***' capability.

Product Details

Australian Standard	AS4145.2.2008, SL7 Security, D7 Durability
Compliance	Regulatory Compliance Mark (RCM) for Australia and New Zealand

Lume

Interior Smart Lever

The Lockwood Lume Smart Lever is designed to bring smart convenience to the doors inside your home — without compromising on style.

Whether it's a garage connecting door or home office, Lockwood Lume is thoughtfully crafted to blend seamlessly into your interior spaces.

Lockwood Lume offers multiple ways to unlock, combining ease of use with the trusted security Lockwood is known for. You can unlock it using your fingerprint, through the Lockwood Home App via the built-in Bluetooth connectivity, or with a mechanical key when needed — and when you need complete privacy, the internal forced lock gives you the same assurance as a traditional latch. And if the battery runs out unexpectedly, a simple Type-C cable connection lets you recharge and regain access immediately, making it a worry-free solution for everyday living. Best of all, the plug-in model allows for easy installation with no door modification required, making it an ideal upgrade for any interior room.

Created for all types of interior doors, the Lockwood Lume Smart Lever is more than just a smart lock. It's a statement of thoughtful design and seamless technology that fits effortlessly into the flow of your daily life.

Lume

Interior Smart Lever

Exterior Interior

Compatible with Lockwood Home App/Yale Home App

With Bluetooth connectivity included, you can have total control over your lock through the Lockwood Home App/Yale Home App.

Dual Backup Access

Powered by 4x AAA batteries (included) with USB-C emergency power and mechanical key override for reliable entry anytime.

Fingerprint Access

You can have up to 100 fingerprint user codes.

Door Thickness

35mm to 60mm.

Voice Guided Programming

Will audibly provide step by step programming instructions.

Retrofittable

Fits majority of doors with 54mm hole.

Low Battery Warning

Receive a notification on your smartphone and a voice prompt from the lock when the battery is low, keeping you informed on both ends.

LED Status Indicator

Instantly know your lock's status with LED light indicators.

Internal Forced Lock

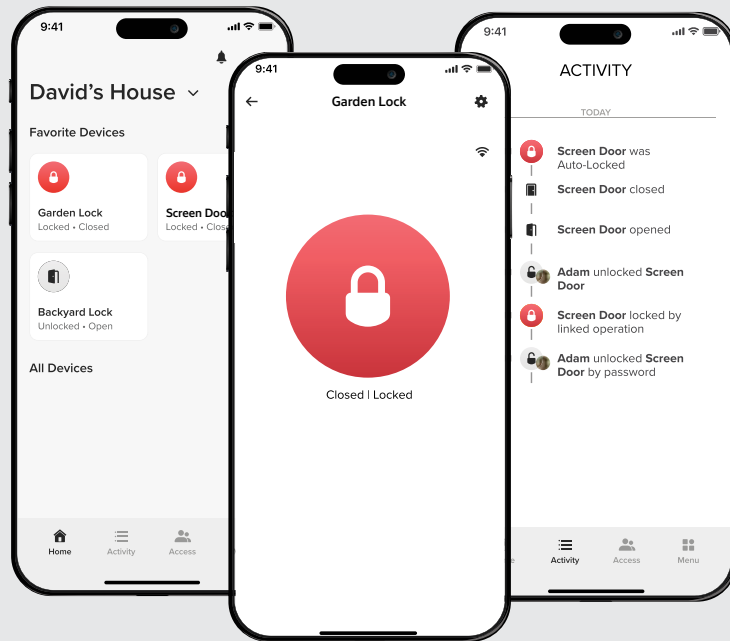

Option to disable all outside unlocking for full privacy. Only the admin user can operate the lock when Internal Forced Lock is activated, ensuring complete control and security.

Passage Mode

Option to disable the auto-lock function, allowing anyone to open the door freely without the need to authenticate.

Home App

The Lockwood Home App is your intuitive interface for complete control of Lockwood and Yale smart devices. It makes managing your locks simple and straightforward, giving you the ability to adjust settings directly from your phone. You can create tailored access for family, friends, or service providers, including temporary codes or time-sensitive access windows for guests or tradespeople, and revoke access instantly for added security. The app also provides 24/7 lock activity trails, so you always know who accessed your door and when, giving you peace of mind wherever you are. Designed with a clean and user-friendly interface, the Lockwood Home App delivers the best experience for monitoring and managing your smart locks.

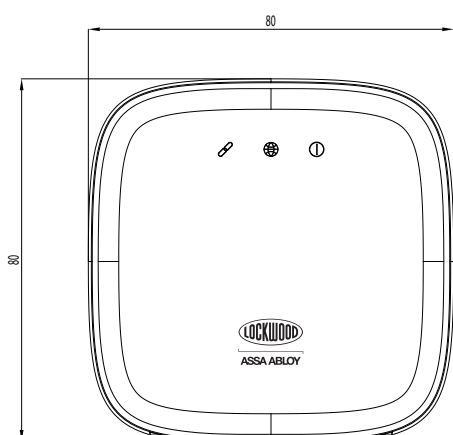

Please note: Features such as door position sensing, voice assistant integration, and remote access depend on your lock and hub hardware—not the App itself. For the latest compatibility details, visit the individual product page on our website.

Key Features

- Total control via the App
- Tailored user access (including temporary and time-sensitive access)
- 24/7 Lock Activity trails
- Simple and intuitive interface for Lockwood and Yale smart devices

Accessories

Home Hub

The Lockwood Home Hub is the central connection point for your smart home, designed to keep your devices seamlessly integrated while freeing up your power points. It supports up to 16 Lockwood and Yale Bluetooth smart devices and 30 Zigbee actuators, including Lockwood Smart Aeris Window Actuators and Yale Aeron Smart Window Actuators, giving you flexibility for even the most connected homes.

With the Lockwood Home Hub, you can access and manage your Lockwood and Yale smart devices remotely, providing control from anywhere. It also enables integration with smart home ecosystems, allowing you to create automations such as turning on lights when your door unlocks or playing your favourite music as you walk in.

For the latest information on smart home integration and voice assistant compatibility, please visit the individual product page on our website.

Features and Specifications

- Grow your Lockwood Home Automation: Supports up to 16 Bluetooth and 30 Zigbee Lockwood/Yale smart home devices
- Expand the capabilities of your Lockwood Home by enabling new features including SyncPath Technology**
- Seamlessly manage your Lockwood smart devices from anywhere using the Lockwood Home App
- Enables smart home connectivity
- Simple App-driven set-up process

* Home size, layout and building material can impact performance. Medium and larger sized home may require additional devices for full coverage

** SyncPath Technology requires pairing the Yale Unity Screen Door and your Lockwood Smart Lock with the Lockwood Home Hub.

Lockwood and Yale smart products work seamlessly together, letting users control them through either the Lockwood Home App or Yale Home App.
