

Prior to fitting this padlock accessory, familiarise yourself with its simple function and plan the position to best suit your requirement, taking into account the following:

- Modifications to the structure to accommodate the accessory
- Inward, outward, or sliding operation
- Right or left hand operation
- Position to give maximum fixing strength
- Orientation to suit fixed or opening leaf

Note: The security rating of this product was achieved using the fasteners supplied in the pack. The use of fasteners other than those supplied can affect the security performance.

Mounting instructions

1. Modify the structure to accommodate the accessory if required.
2. Position the template or product carefully within the limits of the mount position and mark all fixing holes.
3. Drill the holes to suit the fasteners provided.
4. Mount the accessory using the fasteners provided.

Cut along the dotted line
